Elicited by picture naming.

Scoring: 1 = correct (local adult model),
 0 = incorrect/unable to attempt
 NT = not tested

What consonants does the child use in initial position?

What consonants does the child use in final position?

What processes are seen?

Stopping
Prevocalic voicing
Fronting
Gliding
Backing

Final consonant deletion
Assimilation
Metathesis
Glottal substitution
Favourite articulation
Inconsistency

Imprecise placement
Weak articulation
Inadequate airflow

What vowels are used?

long vowels	diphthongs	short vowels

Any processes affecting vowels?

Are final consonants joined smoothly?

Lengthening	Lack of half-open vowels
Shortening	Neutralisation
Reduction of diphthongs	Nasalisation

Any voice/prosodic features to comment on?

Phrases & Sentences (1)

Elicited by imitation, supported by pictures. (Model at a slow normal rate, in normal conversational speech. Take care to model the junctions marked.)

Target/Response	
My baby.	
Katy's party.	
Tommy cutting paper.	
Farmer sitting.	
Daddy _j is talking. (/j/)	
A cup _o f tea. (C#V)	
Two sad _u cats. (C#C)	
Get an _a pple. (n)	
Go _i n the house. (/w/)	
Dinosaur museum.	
Do you like `je,lly? (intonation)	
Scoring: 2 = correct (local adult model) 0 = more than 1 error/unable to attempt 1 = only 1 error NT= not tested	

Assimilation	Junction
Final consonant deletion	Rate of speech/stress patterns
Cluster reduction	Pitch/voice quality
Imprecise vowels	Resonance
Imprecise consonants	Intonation
Syllable deletion	Compensatory strategies

Name _____

Connected Speech Checklist

A taped sample of the child's typical spontaneous connected speech should be elicited by conversation or a story retell task.

1.	Joins 2+ words together and uses plosives, nasals and approximants in simple syllable structures (CV, VC, CVCV, CVC), with errors and omissions; differentiates some vowels.	
2.	Uses a basic range of at least 8 vowels, including long, short and diphthongs.	
3.	Uses a full range of vowels, clearly recognisable.	
4.	Maintains basic place contrasts (labial/alveolar/velar) 80% of time.	
5.	Maintains manner contrasts (plosive/nasal/fricative/approximant) 80% of time.	
6.	Maintains voicing contrasts 80% of time.	
7.	Marks/indicates syllables in words of up to 4 syllables.	
8.	Uses final consonants 80% of time.	
9.	Uses medial consonants (initial consonant of second syllable of CVCV) 80% of time.	
10.	Uses full range of fricatives and affricates, excluding /θ ð/.	
11.	Produces multisyllabic words accurately 80% of time.	
12.	Uses some clusters.	
13.	Uses initial /s/ and /l/ clusters 80% of time.	
14.	Uses medial and final clusters 80% of time.	
15.	Achieves normal assimilation and elision.	
16.	Achieves acceptable voice quality in connected speech.	
17.	Achieves acceptable volume in connected speech.	
18.	Achieves acceptable oral/nasal balance in connected speech.	
19.	Achieves acceptable rate and rhythm in connected speech.	
20.	Achieves acceptable stress and intonation patterns in connected speech.	
		TOTAL

Oro-motor Assessment (1)

Use the questions at the beginning of each section to help decide whether to assess. Give verbal instructions and demonstrate the skills required. Allow more than one attempt and record the best as achieved/not achieved.

Lips & Jaw		
<i>Does the child have any feeding difficulties? Does he drool? Does the child have limited lip mobility in speech? Are vowels distorted?</i>		
<i>If yes, ask the child to do the following:</i>	achieved	not achieved
Open your mouth wide like this.		
Close your mouth like this.		
Round your lips like this.		
Smile like this.		
Open wide and then smile, like this. (x1)		
Open wide and then smile, like this. (x5)		
Smile and then round your lips, like this. (x1)		
Smile and then round your lips, like this. (x5)		
Round your lips and then open wide, like this. (x1)		
Round your lips and then open wide, like this. (x5)		

<i>Answer the following questions from the single sound imitation task. Can the child achieve accurate lip placements for speech sounds:</i>		
Bilabials / p m b /		
Labio-dental / f v /		
Open vowels / a æ /		
Rounded vowels / u /		
Spread vowels / i /		
Half-open vowels / ɔ ɜ /		
Diphthongs / ai au iə /		

Comments: structure, tone, movement, associated movements, symmetry, drooling, wetness, groping, tension, automatic movements.

Name _____

Date _____

Age _____

Oro-motor Assessment (2)

Tongue

Does the child have any feeding difficulties? Does he have difficulty licking? Does he have difficulty with lingual consonants or distorted vowels?

<i>If yes, ask the child to do the following:</i>	achieved	not achieved
Put your tongue out, like this.		
Stretch and point your tongue, like this.		
Put your tongue away, like this.		
Move your tongue to the side, like this.		
Move your tongue to the other side, like this.		
Stretch and point your tongue when you move it to the side, like this. (tip on lateral)		
Move your tongue down, like this.		
Put your tongue up, like this. (external to mouth)		
Stretch and point your tongue when you put it up, like this. (tip on elevation)		
Put your tongue up behind your teeth, like this. (internal)		
Move your tongue from side to side, like this. (x1)		
Move your tongue from side to side, like this. (x5)		
Move your tongue up and down, like this. (x1)		
Move your tongue up and down, like this. (x5)		
Put your tongue in and out, like this. (x1)		
Put your tongue in and out, like this. (x5)		

Answer the following questions from the single sound imitation task. Can the child achieve accurate tongue placements for speech sounds:

Vowels		
Alveolars / t d n /		
Velars / k g /		
Fricatives/affricates / s ʃ tʃ dʒ /		
laterals / l /		

Comments: *structure, tone, appearance, associated movements, drooling, wetness, groping, tension, automatic movements.*

Name _____

Date _____

Age _____

Oro-motor Assessment (3)

Airstream

Can the child blow? Does he appear to run out of breath when speaking? Does he have difficulty achieving plosion or friction? Does he use clicks, ejectives, implosives?

<i>If yes, ask the child to do the following:</i>	achieved	not achieved
Show me how you blow.		
Do a long blow. (2 seconds)		
Blow a pipe/whistle.		
Blow bubbles/candles/feather.		
Blow through a straw. (wide)		
Blow through a straw. (narrow)		

Answer the following questions from the single sound imitation task.

Can the child achieve plosives?		
Can the child achieve fricatives?		

Voice

Are there concerns about the child's voice quality, pitch, volume, intonation or prosody.

<i>If yes, ask the child to do the following:</i>	achieved	not achieved
Make a long sound, like this. (prolonged vowel)		
Make your voice go up, like this. (rising contour on long vowel)		
Make your voice go down, like this. (falling contour, long vowel)		
Make a loud voice, like this. (long vowel)		
Make a quiet voice, like this. (long vowel)		

Answer the following questions from the single sound imitation task.

Can the child achieve long vowels?		
Can the child achieve diphthongs?		

Comments: use of ingressive airstream, nasal emission, abnormal voice quality, volume, pitch, intonation, vocalisation, cry, laugh.

Name _____

Date _____

Age _____

Oro-motor Assessment (4)**Palate**

Is there any nasal emission on consonants? Is there hypo/hyper-nasal resonance on vowels? Does the child only have nasal consonants? Is there a history of cleft palate or nasal regurgitation when feeding?

<i>If yes, ask the child to do the following:</i>	achieved	not achieved
Open your mouth wide and say "ah". (palatal elevation)		
Blow like this. (oral blow)		
Can you say b—m—b—m—b—m? (oral/nasal contrast)		
Can you say t—n—t—n—t—n? (oral/nasal contrast)		

Answer the following questions from the single sound imitation task.

Can the child produce nasal consonants?		
Can the child produce oral consonants?		
Can the child produce oral vowels?		

Comments: *structure, nasal resonance (hypo/hyper/mixed), nasal emission, grimace.*

Name _____ Date _____ Age _____

DDK Assessment (syllables)

Instructions: "I'm going to say some sounds and I want you to say them after me. Listen carefully and try to say them exactly like I do. Good. Now I want you to say that five times as fast as you can. I'll say go when it's time to start. I'm going to time you to check how fast you are." Shaded items are for practice. All responses should be transcribed.
